<b>30-39: 51</b> (16.2%)	<b>80-89: 9</b> (2.9%)
<b>40-49: 43</b> (13.7%)	<b>90+: 2</b> (0.6%)

### HOW WE ARE SEEING COVID-19 SPREAD

- In the days prior to individuals becoming sick or while experiencing symptoms, individuals reported attending gatherings where people are not social distancing and not wearing masks. This includes holiday gatherings.
- We continue to see spread between positive cases and other people living in the household/living unit.
- We are seeing more community spread, meaning individuals are unsure where they got the virus.
- Currently, there are 69 active public health investigations. Skilled nursing and assisted living facilities account for a number of positive cases.
